

# DUAL SCREEN ACTION CAMERA KIT

User Manual

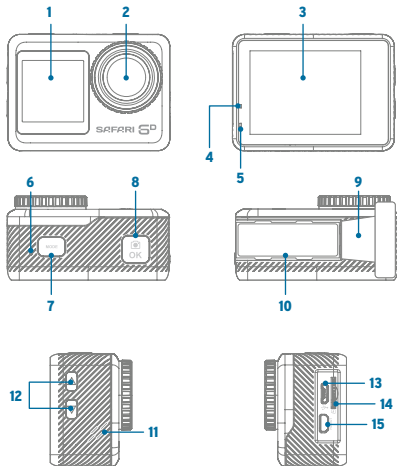

## **WARNING**

- 1.** This is a sensitive piece of electronic equipment, please take care of your camera and do not let it fall.
- 2.** Avoid having your camera near anything with a strong magnetic field or radio signal, this can effect sound and image quality or prevent correct functioning of the product altogether.
- 3.** Please do not expose the camera to direct sunlight or high temperature.
- 4.** Please store your camera in a dry and protective area.
- 5.** Lithium battery inside! Do not try to open the product and do not expose to heat, water, moisture or direct sunlight.
- 6.** Please take care when charging the batteries and keep away from children.

## APPEARANCE AND BUTTONS

- 1 Front HD LCD Screen (1.3")
- 2 Lens
- 3 Rear HD LCD Screen (2")
- 4 Busy Indicator
- 5 Charging Indicator
- 6 Power Indicator
- 7 Power/Mode Button
- 8 Shutter/OK Button
- 9 Battery Door
- 10 Battery
- 11 Speaker
- 12 Up / Down Buttons
- 13 USB-C Port
- 14 Micro SD Card Slot
- 15 Micro HDMI Port

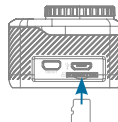

## OPERATING INSTRUCTIONS

### 1. Charge the Battery

Connect the camera to a computer or USB wall charger for charging. The red Charging Indicator light will turn on to indicate charging in progress. The light will turn off when charging is complete. Ensure that the battery is fully charged before use.

### 2. Using the Micro SD card

Push a Micro SD card into the slot until it clicks into place. The label will face the back of the camera. To remove the Micro SD card, press the tail of the card inward softly and it will eject from the camera.

### 3. Power On/Off

**Power On:** Press and hold the Power/Mode button  for 3 seconds, the screen will turn on and the camera will be ready for use.

**Power Off:** Hold the Power/Mode button  for 3 seconds, the camera will turn off.

### 4. Switching Between Modes

The camera has 3 modes: video recording, photography, and menu. After the power is on, press the Power/Mode button  to cycle between them.

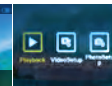

#### Video Recording Mode

#### Photography Mode

#### Menu Mode

### 5. Busy Indicator Light

The Busy Indicator will be lit blue when the camera is recording videos, shooting photos, etc.

### 6. Front LCD Screen

Press and hold the WiFi/Down button  while in video recording, photography mode to switch between front LCD screen and rear LCD screen.

# VIDEO RECORDING MODE

When first turned on, the camera will start off in Video Recording Mode. Press the Shutter/OK button  to start recording; press the Shutter/OK button  again to stop recording.

**Note:** If the memory card is full or the battery power is low, the camera will automatically stop recording.

- 1 Current video recording mode
- 2 Current video recording mode and resolution
- 3 Current battery level
- 4 Microphone icon indicating that the microphone is active
- 5 Available time for recording on the memory card
- 6 Current recording time of video

## 7. Switching between different video recording modes

There are 5 video recording modes: Normal, Loop Recording, Video Time-lapse, Slow Motion and Fast Motion. During any video recording mode, press and hold the Shutter/OK button  to enter video recording mode selection menu:

Press the UP  or DOWN  button to select desired video recording mode then press Shutter/OK button  to confirm selection. The relevant video mode icon will then be displayed in the top left corner of the screen.

# PHOTOGRAPHY MODE

After the power is on, the camera will start off in Video Recording Mode. Press the Power/Mode button  once to enter Photography mode; press the Shutter/OK button  to take a photo.

## 8. Switching between different photography modes

### 13. Transferring media to a computer and charging the camera battery

Connect the camera to a computer using the provided USB cable. The camera will be powered on and four options will appear on the screen: MSDC, PC Camera, Working, Charging

**MSDC:** Connects camera to the computer as an external drive to access or download videos/photos stored in the memory card inside the camera. When the camera is connected to the computer by USB cable, press the UP  or DOWN  button and Shutter/OK button  to select MSDC. Search external drive from the computer directory to access the data stored in the camera. Unplug USB cable to exit.

**PC Camera:** is to use the camera as a web cam on a computer. When camera is connected to a computer by USB cable Press the UP  or DOWN  button and the Shutter/OK button  to select PCCAM, PC Camera function will be activated shortly. Unplug USB cable to exit.

**Note:** This feature is not compatible with all computers.

**Working Mode:** is used to operate and charge the camera when the battery is not inserted in the camera or when the camera is in low power mode. Press the UP  or DOWN  button and the Shutter/OK button  to select Working when the camera is connected to a computer by USB cable. Unplug USB cable to exit.

**Charging Mode:** is used to charge the camera by connecting to computer. Press the UP  or DOWN  button and Shutter/OK button  to select Charging when it is connected to a computer by USB cable, the camera will turn off and start to charge. Unplug USB cable to exit.

**Note:** Charging can also be achieved by plugging the camera into a USB wall charger. No mode selection is needed to charge this way.

## APP (FOR ANDROID AND IOS)

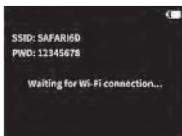

### How to obtain the APP installation program

On Android and Apple (iOS) devices search “Safari Connect 6D” in the Apple APP Store or Google Play Store (depending on your mobile device) proceed with installation of the APP on your device.

System Requirement: IOS 8.0 or above; Android 8.1 or above

### How to connect the camera to the mobile device

1. Install the “Safari Connect 6D” APP on your Android or Apple (iOS) device.
2. Insert a Micro SD card into the camera and then power it on.
3. Turn the Wifi on by pressing the Wifi/Down  button . Then the WiFi information screen will appear providing a SSID name and password. To disable the Wifi press the Wifi/Down  button again.

4. Enable the Wifi function of the mobile phone or tablet and wait for the “Safari 6D” network to appear; select the connection and enter the password that appears on the screen of the camera.

5. Open “Safari Connect 6D” APP on the mobile phone or tablet.

6. Select the camera name as it appears on screen.

7. You can directly view the preview picture transmitted by the camera, and then conduct relevant operations.

8. Recorded photo and video files can be viewed and uploaded from the camera to the mobile device through the application.

**Note:** Previews appear in lower resolution but high resolution files will be available once uploaded to the mobile device.

9. Content can then be easily shared with all of your friends through messaging or social media platforms.
